MAHURKAR™* 13.5Fr High Flow Catheter Kits and Trays

- Larger Double-D™* lumen design optimizes flow with lower arterial pressure
- Polyurethane material facilitates ease of insertion yet softens at body temperature
- Laser-Cut side slots designed to reduce the likelihood for positional occlusion and clot formation by minimizing debris attachment
- Multiple catheter configurations and sizes accommodate various insertion sites
- Soft, atraumatic green tip designed to reduce vessel trauma during insertion
- Clear silicone extensions provide kink resistance and view of blood
- Durable Ultem™* adapters resist cracking
- Transparent, rotatable suture wing facilitates easy viewing of insertion site
- Radiopaque for quick visualization

Double-D™
Design

MAHURKAR™ 12Fr High Pressure Triple Lumen Catheters: Indicated For Dialysis, Apheresis, Infusion, High Pressure Injection & Central Venous Pressure Monitoring

- Laser-Cut side slots designed to reduce the likelihood for positional occlusion and clot formation by minimizing debris attachment.
- Soft Atraumatic Tip designed to reduce vessel trauma during insertion.
- 19ga. Distinctive 3rd Dedicated line.
- Modified Double-D™ Lumen design ensures equal and consistent flow rates.
- Imprinted Printing Volumes on catheter extensions quickly identify catheter locking volumes.
- 180° Curved Extensions help stabilize the catheter and provide patient comfort.
- Rotatable Suture Wings enable the tip to be rotated after implantation and stabilizes the catheter.
